Letter of Appreciation

Sub: Implementation of Workshop Information System (coach)
Developed by CRIS-Reg

CW/PER has successfully implemented online WISE software developed by CRIS. It is proudly to say that it is the first workshop in Indian Railway implemented the software developed by CRIS for incentive calculation. CW/PER reached another milestone by this implementation, which has the following benefits after integration with IPAS (AIMS):

1. No separate data entry required for JC wise Manhour for calculation of incentive.
2. POH cost of coaches can be easily arrived.
3. Claiming of POH bill through online is possible.
4. Anywhere in Indian Railway Coach/Wagon outturn and Manhours details can be viewed.
5. This will give useful information for Manpower and Material planning for Workshop Managers.
6. It saves Manpower and saving money by avoiding redundancy of data entry work.

I wish to express gratitude towards officials of Production and Coaching wing, SSEs & Staff of System Administration Team, SSEs & Rate fixers of Planning wing, SSEs/Staff of Inspection and all SSE/JEs Supervisors of shop floor for their involvement and dedication in implementation of this software.
